

Thomas Furay

Software Engineer

SUMMARY

Detail-oriented software engineer skilled in creating and deploying modern, semantically structured web applications. Proven ability to collaborate with teams, apply agile methodologies, and meet tight deadlines. Seeking a challenging role with a company that values creativity and innovation.

WORK EXPERIENCE

Software Engineer, 100Devs, Los Angeles, CA

January 2022 — Present

- Collaborate with a team of developers to build modern and responsive web applications using best practices
- Develop semantically structured full-stack web applications that are user-friendly and easy to navigate
- Apply agile methodologies like SCRUM for project management, resulting in increased efficiency and faster delivery

Recent Projects:

- Designed and built a Restaurant Management App (Full-Stack Web App) that provides accessible communication with all staff, increasing collaboration and efficiency
- Developed a What's For Dinner? (Full-Stack Web App) that allows users to share and save recipes, increasing engagement and user retention
- Designed and developed a Jeopardy-style board game for a high school teacher to use in class, increasing student engagement and learning outcomes
- Collaborated with a San Francisco Card Sharks Club to build a Black Jack card counting trainer, improving players' skills and strategies

Freelance Web Developer, Santa Rosa, CA

August 2020 — Present

- Managed projects independently, using strong project management skills to meet tight deadlines and deliver high-quality results
- Stayed up-to-date with the latest web development trends and technologies, maintaining a high level of technical expertise
- Developed full-stack web applications and static websites for clients, consulting on SEO and social media strategy to increase online presence and engagement

Cook/Server, Spring Lake Village, Santa Rosa, CA

March 2017 – August 2020

- Demonstrated excellent time management skills in a high-stress, fast-paced work environment, consistently meeting deadlines and delivering quality work
- Collaborated effectively with team members to assist the prep team before rush hour, increasing efficiency by 35%
- Communicated effectively with clients, demonstrating strong interpersonal skills and providing excellent customer service
